SUMMARY

Experienced in developing web applications related to the hotel's website management system, I had an internship at the Intelligent Automation Research Center for two months and continued working part-time for 4 months. I gained valuable experience in large-scale projects. I actively participated in problem-solving for key features, enhancing my technical skills and other soft skills. Beyond coding, I developed a keen understanding of customer needs, addressing weaknesses in the system to improve overall functionality. I also had the opportunity to present my own work to entrepreneurs sharpened my presentation skills and provided opportunities for knowledge exchange. Now, I'm eager to bring my skills to LSEG, contributing to the development of systems for larger organizations. I believe my problem-solving, customer-centric approach, and effective communication make me a valuable asset for your team. I look forward to the opportunity to contribute to LSEG's success.

WORK EXPERIENCE

● Apr 2023- Sep 2023

🏢 Intelligent Automation Research Center (PSU)

Frontend Developer

HOTEL WEBSITE MANAGEMENT SYSTEM

Developed a hotel website management system for hotels and hotel operators. This system consists of subsystems within the main structure which provide a wealth of information for managing the user's website data and layout. Various in and update information at any time through the back office administrator website manager.

Bachelor's of Computer Engineering

Prince of Songkla University
senior

2020 - Present

STRENGTHS

- Time Management
- Problem-solving
- Accountability
- Patience
- Teamwork
- Learning and openness to new technologies

PROGRAMMING

Languages :

- JavaScript
- HTML/CSS

Frameworks :

- **React.js**
- **Next.js**
- Nodejs
- Tailwind CSS
- Bootstrap
- Material UI

TOOLS

- Postman
- Github
- Vscode
- ChatGPT

Databases :

- Mongo DB

Otherskills:

- Restfull-API
- React Hook

PROJECTS

Hotel website management system

Front : [singgoldenplace.com](#)
[cococat.eaccomm.net](#)

Creator

- Create responsive, accessible, and mobile-first web application design on display.
- Create admin form to edit the webpage in many cases that managers want to get by have two mode edit that is Mobile side edit and desktop side edit.
- Send the data obtained from the form input values to the predefined conditions, then display the results on the website according to user preferences.

FrontAdmin : [next-js-developer-portfolio-starter-code-b3jn.vercel.app/hotelweb_project](#)

SKILLS

- Responsive Web design
- User Center Design
- User Experience (UX)
- User Interface (UI)
- Color Theory
